Nonmetallic

Our chairs are made from eco-friendly, see through polycarbonate plastic and are 100% recyclable. Because Jetweels are totally non-metallic, they easily pass through standard airport metal detectors, are antimicrobial resistant, are MRI machine environment friendly, and are completely waterproof.

■ Airports

Non-metallic - Security process times are reduced for passengers with reduced mobility.

■ Medical and Rehabilitation Facilities

MRI friendly.
Water-proof.

■ Resorts & Hotels

Light weight.
Water-proof.
Brandable.
Available ad space.

■ Correctional Facilities

Non-metallic see through polycarbonate construction ideal for security inspection assurance.

Fringe

benefits

Our unique design and the eye catching array of colors promote a cheerful atmosphere and offer opportunities for specialized branding and advertising.

■ Children's Hospitals

Whimsical colors.
Slogans.
Hospital logos.

■ Theme Parks

Park characters.
Ad space.

■ Sports Arenas

Team colors.
Logos.
Sponsor placement.

Break away from the mundane!

Our unique, non-traditional/non-metallic design makes our transport chairs easily identifiable in the crowded environments. Custom colors and company or organization logos or advertising make our chairs stand out from the standard/typical transport chairs seen in most airports.

Add some color and creativity to your transport chair service!

Aesthetic design and color combinations

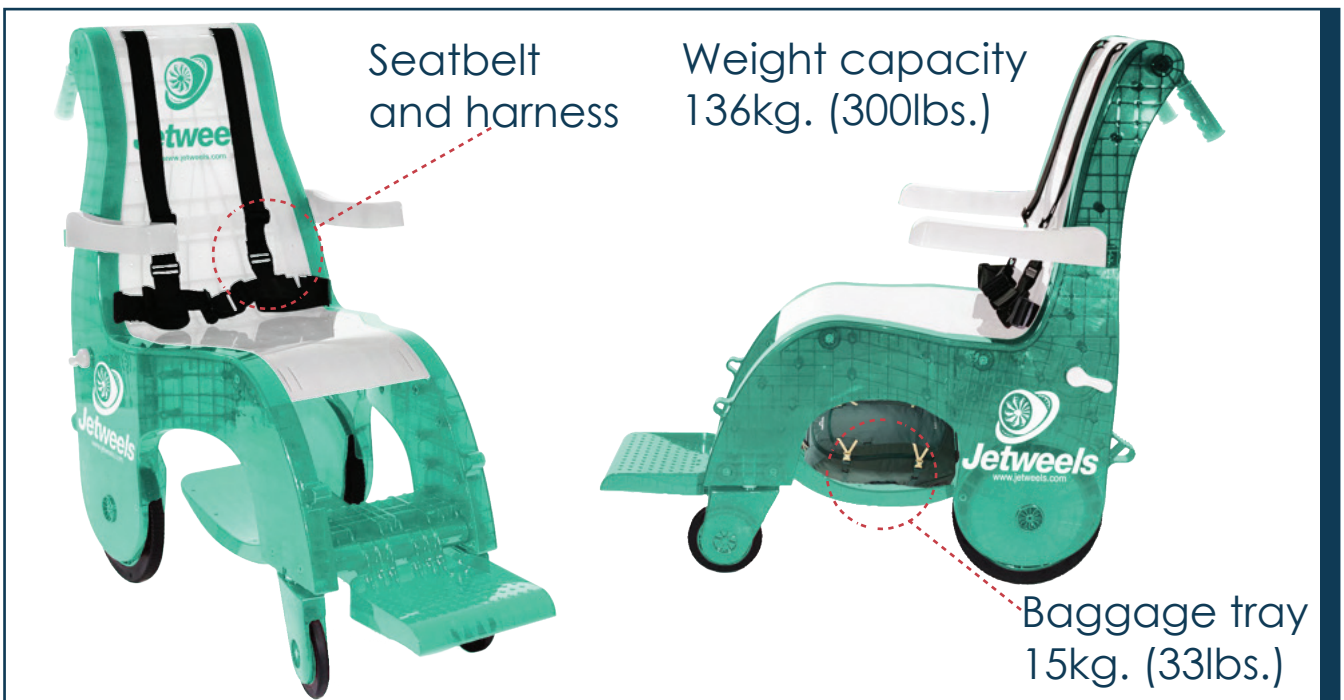

10 color combinations make it easy to adhere to corporate color schemes or promotional sponsorships providing maximum visibility in any environment

Innovative design features

- **Environmentally Friendly:** It's made from raw polycarbonate but it's 100% recyclable.
- **Stability:** Jetweels weight distribution makes it very stable on flat or inclined surfaces.
- **Maneuverability:** 8 radial ball bearings make for smooth and easy maneuverability.
- **Comfort:** Hassle-free arm and foot rests plus ergonomic design = comfort.

Easy Storage

Nesting minimizes storage space
